Bio

Boom-bust cycles. They're occurring more frequently than ever. The most notorious ones impact financial markets, but they also impact nations, healthcare, food, energy, education, technology and many other areas as well. Speaker Vikram Mansharamani, the bestselling author of *Boombustology*, is expert at helping audiences recognize and manage the risk of "bubble trouble." So valuable are his insights, that LinkedIn named Vikram #1 on their "10 Top Voices in Money and Finance" list in both 2015 and 2016. In his engrossing talks, Vikram steps back from complex market dynamics and uses a multiple-lens framework to look at disparate data to provide actionable insights and indispensable information.
