Bio

Warren Macdonald's life's boundaries were redefined in April 1997 with his accident on North Queensland's (Australia) Hinchinbrook Island. Climbing to the Island's tallest peak, he became trapped beneath a one-ton slab boulder in a freak rock fall. Two days later he was rescued, only to undergo the amputation of both legs at mid-thigh. Just ten months later, he climbed Tasmania's Cradle Mountain using a modified wheelchair and the seat of his pants. [morelink]
