## The Magic Of Collaboration Team Building Workshop

*"Entertaining, relevant and motivational."*

Research In Motion

*"Exceeded all of our expectations!"*

Sysco Foodservices

*"Fun, exciting and very informative."*

Campbell Soups

**The Concept.** Participants working in small teams collaborate to learn and perform magic tricks, and experience the parallels between performing on the stage and performing in the real world.

**Our Experiential Approach.** The skill set necessary to effectively perform a magic trick closely resembles that required to successfully perform in the business world. Using magic as an entertaining, non-threatening and non-physically challenging medium, participants learn both 'how' and 'why' the tricks work, develop a real-world presentation for their trick and learn how to present their trick with impact.

**Anthony Lindan's** communications expertise was honed over a 20 year career as a professional magician delivering thousands of magic presentations designed to produce measurable results at trade shows, product launches and sales meetings across North America. Drawing on this experience, Anthony Lindan reveals the real secrets of collaboration, influence & persuasion and commanding the stage!
